

WIA-Europe: Bremen RN

Career Workshop - 'She Leads Tomorrow'

'WIA-Europe Leading Tomorrow' is a programme for training (future) leaders

About the Programme:

This program offers young women a unique opportunity to gain the knowledge, skills, and experience necessary to take on top leadership and executive roles in the future.

Objective

The programme focuses on the following areas:

- Development of basic competencies in leadership and management;
- Development of basic self-management skills;
- Insight into leadership and management in universities, research institutions and companies;
- Development of a career perspective based on personal strengths and motivation.

Programme Structure

Through participation in the Program, students and young professionals will have the opportunity to improve their leadership competencies, build a network of business contacts, and be inspired by the career paths of leaders. For each session, a special Guests will be invited – inspiring individuals: HR partners, coaches, pioneers, female and male leaders who have achieved success, and can serve as role models for young people. The program aims not only to impart knowledge but also to deepen awareness of one's strengths and potential, as well as to identify areas that require development
